

00TEACHING METHODOLOGY

Primary section:

- The curriculum aims at the physical, social, emotional and cognitive development of the students.
- It follows the principle of integrated education.
- The language curriculum is designed to provide rich experiences in listening, speaking, reading and writing.
- To deal with a mathematical concept, concrete material, relevant situations and games are used.
- The Science curriculum provides opportunities for exploring, experimenting, observing and drawing conclusions.
- Sports curriculum lays emphasis on development of gross motor skills, stamina, flexibility, balance, strength and overcoming fear.
- Art, music, dance and theatre help students to express themselves and connect to their inner selves.

Middle and Senior classes:

- The senior school curriculum is designed to facilitate enquiry, research and rigorous study such that young people can connect with increasingly complex constructs with an enduring interest.
- Theme based curriculum approach continues in the middle and senior classes with project work spread out over longer periods of time and across all discipline
- Project presentations are often put together as exhibitions and models that are shared with different classes. In the middle & senior school, specific processes are also integrated with the curriculum to help students take the impending unit assessments and examinations with confidence.
- Our students are encouraged to take national examinations like Olympiad or McMillan's International Assessment of Indian School examinations to ensure that our students are at par with peers across the country.

- ✓ Our typical class size is about 25 to 35 students. We strongly believe that a teacher can best manage and effectively teach a class of this size. Our junior classes from Pre Nur to Std II are fitted with AC. We monitor the cooling very closely so that the room is just cool enough for The students enjoy their time in the class.

- ✓ Prarambhika runs its own transport fitted with GPS and highly reliable drivers. You are able to view their vehicle movement on the school app on a smart phone.
